

Technical Reviewing and Judging Record

IMPORTANT: This document is artificially generated for testing the VisaPilot evidence-reconciliation workflow. It is **not** an authentic employer, journal, conference, government, or third-party record and must not be presented as real evidence.

Evidence source type: Synthetic conference/hackathon record

Claim selected for testing

“University Hackathon Judge — 2024. Technical judge for a university-level software hackathon.”

Document content

For this synthetic test scenario, Arjun Mehta served as a technical judge for a university-level software hackathon in 2024.

His assigned activity included reviewing participating software projects against technical criteria and providing scores and written technical comments to the organizing committee.

The record describes judging activity involving other participants' work and identifies Arjun Mehta as the reviewer/judge.

The document does not establish the prestige of the event beyond the facts stated here and does not make a legal eligibility determination.

Test metadata

Candidate	Arjun Mehta
Test relation	Supports judging activity
Potential criterion	C4
Status	Synthetic

Expected VisaPilot test behavior: this document should be treated as supporting material only after the system parses it, associates it with relevant claims, and reconciles the relationship. The synthetic label should remain visible to the human tester.
